

Antonella Minutolo, PhD

antonella.minutolo@uniroma2.it

Department of Experimental Medicine, Laboratory of Microbiology and Clinical Microbiology
University of Rome "Tor Vergata"

ORCID Researcher unique identifier: 0000-0003-4784-4297
SCOPUS Author ID: 15758064000

From 2022 Assistant Professor (RTDb) at the Department of Experimental Medicine, Microbiology and Clinical Microbiology laboratories, University of Rome Tor Vergata. **Education and Experience:** Biological Science degree at the University of Rome La Sapienza, PhD in Medical Microbiology and Immunology and Post Degree Specialization in Microbiology and Virology at the University of Rome Tor Vergata. **Research topics:** Immune response in infections, inflammatory diseases and cancers; Expression and regulation of Human endogenous Restroviruses; apoptosis and cell cycle, Microvesicles role in inflammation and tumorigenesis.

She contributes in European Project and with industrial partners to for **early intervention in COVID19 patient management** based on 1) Flow-cytometry and molecular integrated Multiplex Analysis and 2) the characterization of the expression of **endogenous Retroviruses (HERVs)** in COVID-19 patients.

Since 2002 she working on different research projects regarding: a) **Early intervention in the management of COVID-19** patient using multiparametric analysis based on Flow Cytometry and molecular profiles b) **innovative bio-therapeutics** in infectious diseases and cancer; c) **Immunological monitoring** and modification during ART therapy in HIV infected individual; d) intestinal microflora, steatosis and chronic liver injury in NAFLD and HCV patients: e) **plant Microvesicles and miRNA in cross kingdom interaction** analysed in HIV individuals, in tumour cell lines, and in *in vivo* NAFLD mice model.

In H2020-StarBIOS2 project (2015-2020), she organized and realized **educational activities for students and general public on public health issues**. She contributed in societal engagement activities and technology transfer in collaboration with the UNESCO chair of biotechnology and bioethics. She has contributed to the organization and implementation of various **technology transfer activities in Africa** as during the Ebola emergency in Sierra Leone (2015-2016) and the creation of a Galenic Laboratory in Cameroon (2017-2018). **50 scientific papers** published in National and International Journals document her experience.

Investigator in research project

- 2022: HORIZON-HLTH-2021-DISEASE-04. "HERVCOV- SARS-CoV-2-induced activation of pathogenic endogenous retrovirus envelope HERV-W: towards personalized treatment of COVID-19 patients"
- 2021-RSA funding "AMELIORATE-Innovative markers of early diagnosis and monitoring of respiratory diseases" PI Claudia Matteucci
- 2020 GeNeuro Innovation "Flow-cytometry and molecular integrated Multiplex Analysis for early intervention in COVID19 patient's management" Grant to Claudia Matteucci to support research activity for the understanding of HERVs role in COVID-19 disease.
- 2015-2020 Project HORIZON2020-ISSI-2015-1 STARBIOS2 G.A. n. 709517.
- 2013-2019: Becton Dickinson and INMI Spallanzani. MULTIFIRE: of the project: Evaluation of the processes of functional immune reconstitution and immunosenescence in HIV-infected naïve patients undergoing antiretroviral therapy. Principal investigator for Tor Vergata Unit
- 2011-2014 Research Unit Member of the FIRB 2011 Project "Intestinal microflora, steatosis and chronic liver damage". Protocol RBAP10MY35
- 2011-2014 Research Unit Member of the FIRB 2011 Project "Cellular and molecular events in the pathogenesis of HBV and HCV infections". Protocol RBAP10TPXK
